European Technical Assessment

**ETA 22/0629
of 30/09/2022**

English translation prepared by IETcc. Original version in Spanish language

General Part

Technical Assessment Body issuing the ETA designated according to Art. 29 of Regulation (EU) 305/2011:

Instituto de Ciencias de la Construcción Eduardo Torroja (IETcc)

Trade name of the construction product:

WDI2, WDI2L, WDI2 SSSt, WDI2L SSSt, WD2IR

Product family to which the construction product belongs:

Deformation controlled anchor made of galvanized steel or stainless steel or stainless steel of sizes M6, M8, M10, M12, M16 and M20 for use in concrete for redundant non-structural systems

Manufacturer:

J. van Walraven holding B.V.
Industrieweg 5
3641 RK Mijdrecht
The Netherlands
website: www.walraven.com

Manufacturing plant:

Walraven factory 3

This European Technical Assessment contains:

15 pages including 3 annexes which form an integral part of this assessment.

This European Technical Assessment is issued in accordance with regulation (EU) No 305/2011, on the basis of:

European Assessment Document EAD 330747-00-0601, "Fasteners for use in concrete for redundant non-structural systems", ed. May 2018.

English translation prepared by IETcc

This European Technical Assessment is issued by the Technical Assessment Body in its official language. Translations of this European Technical Assessment in other languages shall fully correspond to the original issued document and should be identified as such.

This European Technical Assessment may be withdrawn by the issuing Technical Assessment Body, in particular pursuant to information by the Commission according to article 25 (3) of Regulation (EU) No 305/2011.

English translation prepared by IETcc

SPECIFIC PART

1. Technical description of the product

The Walraven WDI2, WDI2L, WDI2R, in the range of M6 to M20, is an anchor made of galvanised steel. The Walraven WDI2 SSt, WDI2L SSt, in the range of M6 to M20, is an anchor made of stainless steel. They are placed into a drilled hole and anchored by deformation-controlled expansion. The anchorage is characterised by friction between the sleeve and concrete.

Product and installation descriptions are given in annexes A1 and A2.

2. Specification of the intended use in accordance with the applicable European Assessment Document

The performances given in section 3 are only valid if the anchor is used in compliance with the specifications and conditions given in annex B.

The verifications and assessment methods on which this European Technical Assessment is based lead to the assumption of a working life of the anchor of at least 50 years. The indications given on the working life cannot be interpreted as a guarantee given by the producer, but are to be regarded only as a mean to choosing the right products in relation to the expected economically reasonable working life of the works.

3. Performance of the product and references to the methods used for its assessment

3.1 Safety in case of fire (BWR 2)

Essential characteristic	Performance
Reaction to fire	Anchorage satisfies requirements for class A1 according to EN 13501-1
Resistance to fire	See annex C7

3.2 Safety in use (BWR 4)

Essential characteristic	Performance
Essential characteristics under static or quasi static loading	See annexes C3 to C6

4. Assessment and Verification of Constancy of Performances (hereinafter AVCP) system applied, with reference to its legal base

The applicable European legal act for the system of Assessment and Verification of Constancy of Performances (see annex V to Regulation (EU) No 305/2011) is 97/161/EC.

The system to be applied is 2+.

English translation prepared by IETcc

5. Technical details necessary for the implementation of the AVCP system, as provided for in the applicable European Assessment Document

The technical details necessary for the implementation of the AVCP system are laid down in the quality plan deposited at Instituto de Ciencias de la Construcción Eduardo Torroja.

Instituto de Ciencias de la Construcción Eduardo Torroja

Item	Designation	Material for WDI2, WDI2L, WDI2R	Material for WDI2 SSt, WDI2L SSt
1	Sleeve	Carbon steel, zinc plated ≥ 5 µm ISO 4042 Zn5/An/T0	Stainless steel, grade A4
2	Cone	Carbon steel, zinc plated ≥ 5 µm ISO 4042 Zn5/An/T0	Stainless steel, grade A4
3	Retention disc	Plastic	Plastic

WDI2, WDI2L, WDI2R, WDI2 SSt, WDI2L SSt anchor

Product description

Product and materials

Annex A1

Installed condition in concrete

- h_{ef} : Effective anchorage depth
- h_1 : Depth of drilled hole
- h_{nom} : Overall anchor embedment depth in the concrete
- h_{min} : Minimum thickness of concrete member
- t_{fix} : Thickness of fixture
- d_0 : Nominal diameter of drill bit
- d_f : Fixture clearance hole diameter

Setting tool

Setting tool can be assembled with a plastic handle for hand protection purposes

Table A3: Setting tool dimensions

Setting tool dimensions	M6	M8	M10	M12	M16	M20

WDI2, WDI2L, WDI2R, WDI2 SSst, WDI2L SSst anchor

Product description

Installed condition in concrete and setting tool

Annex A2

Installed condition in precast prestressed hollow core concrete slabs

- d₀: Nominal diameter of drill bit
- d_{fr}: Fixture clearance hole diameter
- d_b: Bottom flange thickness
- a_p: Distance between anchor position and prestressing steel ≥ 50 mm
- l_c: Core distance ≥ 100 mm
- l_p: Prestressing steel distance ≥ 100 mm
- t_{fix}: Fixture thickness
- c: Edge distance

WDI2R anchor	Annex A3
Product description	
Installed condition in precast prestressed hollow core concrete slabs	

Specifications of intended use

Anchorage subjected to:

- Static or quasi static loads for redundant non-structural systems.
- Use for anchorages with requirements related to resistance of fire (not for using in prestressed hollow core slabs).
- The anchor may only be used if in the design and installation specifications for the fixture the excessive slip or failure of one anchor will not result in a significant violation of the requirements on the fixture in the serviceability and ultimate state.

Base materials:

- Reinforced or unreinforced normal weight concrete without fibres according to EN 206-1:2013+A1:2016.
- Strength classes C12/15 to C50/60 according to EN 206-1:2013+A1:2016: WDI2 / WDI2L anchors.
- Strength classes C20/25 to C50/60 according to EN 206-1:2013+A1:2016: WDI2R / WDI2 SSt / WDI2L SSt anchors.
- Cracked or uncracked concrete.
- Precast, prestressed hollow core concrete slabs, strength C30/37 to C50/60 according to EN 206:2013+A1:2016: WDI2R.

Use conditions (environmental conditions):

- WDI2, WDI2L, WDI2R: anchorages subjected to dry internal conditions.
- WDI2 SSt, WDI2L SSt: anchorages subjected to dry internal conditions, to external atmospheric exposure (including industrial and marine environment) or to permanent internal damp conditions if no particular aggressive conditions exist. Such particular aggressive conditions are e.g. permanent, alternating immersion in seawater or the splash zone of seawater, chloride atmosphere of indoor swimming pools or atmosphere with extreme chemical pollution (e.g. in desulphurization plants or road tunnels where de-icing materials are used). Atmospheres under Corrosion Resistance Class CRC III according to EN 1993-1-4:2006+A1:2015 annex A.

Design:

- Anchorages are designed under the responsibility of an engineer experienced in anchorages and concrete.
- Verifiable calculation rules and drawings are prepared taking into account of the loads to be anchored. The position of the anchor is indicated on the design drawings (e.g. position of the anchor relative to reinforcement or to supports, etc.).
- Anchorages under static or quasi-static actions are designed for design method B in accordance with EN 1992-4:2018
- Anchorages under fire exposure are designed in accordance to EN 1992-4:2018. It must be ensured that local spalling of the concrete cover does not occur.

Installation:

- Hole drilling by rotary plus hammer mode.
- Anchor installation carried out by appropriately qualified personal and under the supervision of the person responsible for technical matters of the site.
- In case of aborted hole: new drilling at a minimum distance away of twice the depth of aborted hole or smaller distance if the aborted hole is filled with high strength mortar and if under shear or oblique tension load it is not the direction of the load application.
- WDI2, WDI2L, WDI2R: the bolt or threaded rod to be used shall be property class 4.6, 5.6, 5.8, 6.8 or 8.8 according to ISO 898-1.
- WDI2 SSt, WDI2L SSt: the bolt or threaded rod to be used shall be property class A4-50, A4-70 or A4-80 according to EN 3506-1:2009
- The length of the bolt shall be determined as:
 - Minimum bolt length = $t_{fix} + l_{s,min}$
 - Maximum bolt length = $t_{fix} + l_{s,max}$

R30 to	Spacing	$S_{cr,fi}$	[mm]	--	4 x h_{ef}			--	--	--
R120	Edge distance	$C_{cr,fi}$	[mm]	--	2 x h_{ef}			--	--	--

¹⁾ in absence of other national regulations the partial safety factor for resistance under fire exposure $\gamma_{M,fi} = 1.0$ is recommended
If fire attack is from more than one side, the design method may be taken if edge distance of the anchor is $c \geq 300$ mm

Table C8: Essential characteristics under fire exposure in concrete C20/25 to C50/50 in any load direction according to EN 1992-4 for WDI2 SSt, WDI2L SSt anchor

Essential characteristics under fire exposure in concrete C20/25 to C50/60 in any load direction				Performances					
				M6	M8	M10	M12	M16	M20
R30	Characteristic resistance: $F_{Rk,fi30}^{0\ 1)}$	[kN]		0.20	0.73	0.87	1.63	3.19	4.12
R60	Characteristic resistance: $F_{Rk,fi60}^{0\ 1)}$	[kN]		0.18	0.59	0.87	1.63	3.19	4.12
R90	Characteristic resistance: $F_{Rk,fi90}^{0\ 1)}$	[kN]		0.14	0.44	0.87	1.63	3.14	4.12
R120	Characteristic resistance: $F_{Rk,fi120}^{0\ 1)}$	[kN]		0.10	0.37	0.69	1.30	2.51	3.30
R30 to	Spacing	$S_{cr,fi}$	[mm]	4 x h_{ef}					
R120	Edge distance	$C_{cr,fi}$	[mm]	2 x h_{ef}					

¹⁾ in absence of other national regulations the partial safety factor for resistance under fire exposure $\gamma_{M,fi} = 1.0$ is recommended
